Rugged Kansas Grown Iris

No, I am Not Out Of Business, as many of you may think, due to the fact that I did not send out a Catalog last year.

It was an unexpected interlude as I was caught in a whirlpool of insurmountable events.

Aside from the fact that I have raised an adorable baby grand daughter now two and one half years old, in February I was called to the bedside of my Dear Mother where I stood by until she was safely through a crisis of four weeks duration.

Then with the many extra duties imposed by the present labor problem, and the Spring rush just around the corner, there was no time for the making of a Catalog.

1944 finds us with fields of fine healthy Iris, and we will strive to give the best service possible under present conditions. So start your orders rolling.

Our rhizomes are husky, drouth resistant, disease free and fresh from our fields to you.

If you are not already a customer, read my Guarantee, order with confidence and become another booster for RUGGED KANSAS GROWN IRIS.

SURE TO PLEASE COLLECTION

60 strong blooming size rhizomes, every one different, unlabeled, for only \$3.00.

This collection will be shipped by express, charges collect.

In this group will be included odds and ends of many fine varieties not usually sold in this manner.

The kiss of the sun for a pardon,
The song of the birds for mirth,
One is nearer God's heart in a garden
Than any where else on earth.

**Price on two or more are for
one kind only.**

Early Dwarf Iris

MESSENGERS OF SPRING

One of the most interesting groups of the Iris family. Often these little fellows will be seen welcoming the first spring days even before the snow is entirely gone. They should be used liberally in the sunny rock garden and are fine border plants for hardy perennial beds or walks. As a table decoration, a low bowl of these pretty babies can't be beat.

Fall Blooming Iris

A newly developed race of Iris coming in dwarf, intermediate and tall bearded types. Blooming in early spring and again in autumn, creating new interest at a time when our garden enthusiasm is low. These naturally are best adapted to those sections of the country where the falls are long and mild, though favorable reports have been received from customers in the far northeast. It is quite essential that they are watered during the summer to help produce new growth and vigor for the second crop of blossoms. They are all rugged varieties, and make an excellent spring showing, blooming here at tulip time.

If you'd have a mind at peace
A heart that cannot harden
Go find a door that opens wide
Upon a little garden.

—E. M. Boulton.

"It's Iris time! It's Iris time! Twixt
Tulip-days and Rose,

The garden walk in Iris time with
purple splendor glows.

The leafy spears are on parade, the
bugles of the June

Summon each bud and bloom and
blade with sturdy marching tune."
